Review Date: September 2023

Whitehouse Primary School Online Safety Policy

At Whitehouse Primary School, high expectations of learning, behaviour and respect for each other underpin everything we do. Our teachers strive to create independent, articulate thinkers and learners who have the confidence to achieve their ambitions. This drives us in our pursuit for excellence every day.

Philosophy

At Whitehouse Primary School the development of all children's social, moral, spiritual and cultural growth is paramount. We believe that the most important function of the school is to maintain an environment in which every member of the school is able to achieve success and self-fulfilment. There must be a total consistency of expectation that everyone (irrespective of gender, race or culture) should feel safe and secure, have empathy for all others, and place a high value upon individual achievement and personal development.

Safeguarding

At Whitehouse Primary School, Safeguarding and Child Protection is paramount and we are fully committed to ensuring the welfare and safety of all our children. We believe that students have a right to learn in a supportive, caring and safe environment which includes the right to protection from all types of abuse, where staff are vigilant for signs of any student in distress and are confident about applying the processes to avert and alleviate any such problems. If any behaviour is a concern in relation to Safeguarding, Whitehouse procedures and processes will be followed at all times in accordance with the Safeguarding and Child Protection Policies. Any concerns will be referred to the Designated Safeguarding Lead, Jackie Puddephatt or Designated Safeguarding Officers: Dan Bass, Linda Kelly, Laura Ward, Steve Milne, Lisa Morris or Luke Devine.

ICT Health, Safety and Welfare

The internet is becoming as commonplace as the telephone or TV in today's society; its effective use is an essential element in 21st Century life for education, business and social interaction. Internet use is a part of the statutory curriculum and a necessary tool for staff and pupils. Our school has a duty to provide students with quality internet access as part of their learning experience.

Online safety includes, but is not limited to, browsing the internet. Other forms of electronic communication and interaction such as e-mail, blogging, social networking and online gaming should be considered as well as the corruption, misuse, hacking and publication of personal data. When using the internet, young people need to be protected from dangers including violence, racism and exploitation. Much of the material on the internet is published for an adult audience and therefore may be unsuitable for pupils. They need to learn to recognise and avoid any potential risks – to become "Internet Wise". Pupils need clear guidance in order to prepare them

to respond appropriately to any situation, using any of the previously mentioned methods of electronic communication, for the inevitable moment when they come across inappropriate material or find themselves in an uncomfortable situation.

A clear school policy is required to help to ensure the safety of our staff and pupils. We have a requirement to provide pupils with as safe an environment as possible and a need to teach them to be aware of and how to respond responsibly to any of the risks.

Why the Internet and electronic communication use is important

The purpose of Internet use in school is to raise educational standards, to promote pupil achievement, to support the professional work of staff and to enhance the school's management functions. Internet use forms part of the statutory curriculum and as such is a necessary tool for learning.

The Internet forms part of everyday society and as such it is every schools' duty to prepare its pupils through quality Internet access with the personal tools to evaluate information and to take care.

There are benefits to the Internet and planned Government initiatives such as:

- Access to world-wide educational resources. (Museums or Galleries)
- Inclusion in the National Education Network connecting schools together
- The potential for world-wide educational materials and resources to enhance the National Curriculum
- Exchange of curriculum and assessment data between National Bodies
- Access school assessment, curriculum and personal resources from any location that has an internet connection

The facility to extend learning beyond the traditional school building into an electronic environment

How the internet will be used to enhance learning

- School Internet access includes filtering appropriate to the age of pupils.
- All Classes will be taught 'Rules for Responsible Internet Use', at the beginning of a school year, and the skills needed in order to use the Internet appropriately.
- Internet access will be planned to enrich and extend learning activities, and pupils will be given clear objectives for all Internet use
- Pupils will be educated in the effective use of Internet in research, including the skills of knowledge location and retrieval
- Supervision is the key strategy, aimless surfing should never be allowed – pupils should always use the Internet in response to an articulated need
- If staff or pupils discover unsuitable sites, the URL (address) and content must be reported to the Internet Service Provider via the Online Safety Lead (Jackie Puddephatt)
- Schools should ensure that the use of the Internet derived materials by staff and pupils complies with copyright law
- Pupils will be taught to acknowledge the source of information and to respect copyright when using information from the Internet

Security of information and systems

Online safety will encompass the security of not only the Internet but the delivery of Internet services and computer applications in school. Issues surrounding the security of access are deemed as important as safeguarding staff and pupils use on on-line activities. Staff and pupils will be expected to take responsibility for their use of the network. As part of their daily use they can be reasonably expected to:

- Keep their password secret from peers
- Ensure that they securely logoff from any workstation they use during the day
- Clean up unused files from the network to assist with the longevity of disk storage devices
- Ensure the removal of any portable storage devices or media
- Password protect any confidential or sensitive information
- Not open any attachments or files from unknown or untrusted sources
- Report any concerns or possible breaches of security to the GDPR Lead
- Realise the school ICT space is not personal space
- Not take copies of any materials that belong to or are the intellectual property of the school
- To leave copies of any planning or resources, created using ICT, that are required by the school

The Online Safety Lead and Service Provider will take reasonable steps to ensure:

- Servers will be located in a locked room with only key personnel given access to the room.
- Virus protection systems will be provided, secured and kept up to date
- Access by wireless devices will be strictly controlled and ad-hoc access prevented through the use of authentication protocols
- The server operating system will be secure and kept up to date
- All inbound internet connections are configured to prevent unauthorised access
- Firewalls will be in place to prevent unauthorised access
- Files held on the school network will be regularly checked for content
- Monitoring of files and Internet usage will be handled in a professional and discrete way
- Breaches of protocols will be discussed and acted upon in collaboration with the Online Safety Lead and SLT
- The Online Safety Lead will review system security and capacity regularly
- Locally block access to websites or any other content that it deems inappropriate (the blocked list).
- Notify the company providing the internet filtering in the event of any inappropriate materials inadvertently being accessed via the Internet or E-Mail

Directed e-mail use can bring significant educational benefits. However, the use of e-mail requires that appropriate safety measures are also put into place. All school provided e-mail accounts are filtered and subject to monitoring.

- Pupils may only use approved e-mail accounts on the school system
- Pupil access to external e-mail addresses is not permitted
- Staff will be encouraged not to access external e-mail accounts at school. Any access during directed teaching time is strictly forbidden
- Pupils must immediately tell a teacher if they receive an offensive e-mail
- Pupils must not reveal details of themselves or others, such as their address or telephone number, or arrange to meet anyone through e-mail communication

- Whole class or group e-mail addresses should be used when classes wish to contact external organisations or personnel
- The forwarding of chain letters is banned
- Official e-mail sent to parents should be written carefully and authorised before sending
- Staff should ensure all emails sent to professional organisations are professional and courteous

The Management and Publication of Content

In this age, the use of websites to showcase a school and the work it produces has become extremely popular. However, it does provide opportunities acquiring sensitive and personal data if consideration is not given to the material available.

Unlike newspapers, the publication of pupil faces and full names is not acceptable. These published images could be re-used especially if a large image has been used. In addition to this, the publication of names and contact details of staff will be discouraged and where necessary, access to this information will be available via other methods or through a secure portal.

Only the schools contact details will be published. Staff or pupil contact information will not be published. The Online Safety Lead and SLT will take editorial responsibility and ensure content is accurate and appropriate. At all times, intellectual property and copyright rights will be respected and complied with.

- Under no circumstances is a pupil's full name to be published anywhere on a website, especially when it might relate to a photograph
- Parents will be given the right to 'opt out' of digital publication in any form of their child on the internet
- At all times, the pupil in photographs should, of course, be appropriately clothed

Social Networking and Personal Publishing

The recent upsurge in the popularity of social networking sites such as Facebook, Snapchat, Instagram and Twitter requires schools to be aware of the potential dangers to staff and pupils. It has become much easier for individuals to publish content and information about themselves on the Internet. The risk of identity theft and the misuse of published photographic material should be considered as risks by all and appropriate steps to educate and protect staff and pupils be made.

- Consideration will be given, at all times, on how to educate pupils in their safe use
- Pupils will be advised never to give out information that will identify themselves, their friends or their location
- Pupils will be directed towards moderated sites
- Pupils will be advised to use nicknames and avatars when using social networking sites
- Pupils will be encouraged not to publish photographic content of themselves
- Staff should not identify pupils of their place of work in status updates
- Staff will be advised not to accept requests from current or past pupils
- Staff must not publish photographic content that contains any images from school or of pupils
- Staff should not publish status updates regarding school life

Filtering Internet Content

In a perfect world, filtering would be 100% accurate and inappropriate material would not be visible to pupils using the Internet. In practice, this is not easy to achieve and cannot be granted.

Pupils should be taught what to do if they experience material that they find distasteful, uncomfortable and threatening. Such a procedure will be detailed further into the policy.

- The school will ensure systems are in place to filter website content
- The Online Safety Lead will make checks to ensure that the filtering is appropriate, effective and reasonable and this is monitored regularly
- A local school white list will be used to open access to websites for educational use by teaching staff. (all temporary access must be agreed with the technician and strict timings agreed)
- YouTube and other video content websites will be available in school for the use of teachers and support staff. Children are permitted to access YouTube (YouTube Kids) or video content websites at school, but only with permission and supervision by a member of teaching staff

If for any reason, the filtering blocks a website that a class teacher feels would be of benefit to the children then it can be added to a whitelisted category and therefore be unblocked for teacher/pupil use. Such additions should be made to the Online Safety Lead who will make a decision on whether or not to add the website to the whitelist.

Videoconferencing and Webcams

The rapid expansion of communications technology requires the school to have a policy on its potential use in education.

- All videoconferencing and webcams must make use of the school network to ensure quality of service and security
- Teachers must request permission from SLT before making a call or using a webcam in a lesson
- All webcam use will be supervised
- At no point will any live streaming from school be permitted to be viewed on the Internet or through the school website

Small wireless devices provide more opportunities for pupil to be exposed to content within school that cannot be controlled or filtered through the school network or security systems. This can even extend to games consoles used in after school care clubs where it is possible to connect to global gaming networks and interact with other people. At all times we need to be aware of the current technology and its possible risk and educational benefit.

- Pupils' mobile phones must not be taken out of bags during the day
- A blog may only be used in school by pupils if it is appropriately moderated
- The school will ensure its network will block connections from devices that are not part of its domain. (Personal laptops, iPads, iPod touches, wireless mobiles)

The Prevent Duty and Online Safety

All schools have a duty to ensure that children are safe from terrorist and extremist material when accessing the internet in schools. We have an important role to play in equipping children to stay safe on line. Internet safety is integral to our computing curriculum. Our staff are aware of the risks posed by online activity of extremists and have a duty to take action if they believe the wellbeing of any pupil is being compromised.

Protection of Personal Data

Personal data will be recorded, processed, transferred and made available according to the Data Protection Act (DPA) 1998 and the General Data Protection Regulation (GDPR) 2018.

Authorisation of Internet Access

Staff need to be vigilant and ensure that any use of the Internet by pupils must be authorised and supervised at all times. This will ensure that any potential risks are reduced and that a pupil will have an immediate point of contact should they have a problem or are uncertain of action to take.

All staff and pupils must be made aware of the rules and regulations surrounding the use of any ICT resource before beginning to use it in education.

- All staff will ensure that they have read and signed the 'Staff Code of Conduct'
- At all times a record of staff and pupils who are granted access to the school network will be maintained
- Any person not employed by the school must be made aware of the rules and acceptable use of ICT systems before being allowed access Risk Management

At all times staff, pupils and parents should be made aware that:

The school will take all reasonable precautions to prevent access to inappropriate material. However, due to the international scale and linked nature of Internet content, it is not possible to guarantee that unsuitable material will never appear on a computer connected to the school network. The school cannot accept liability for any material accessed, or any consequences of Internet access.

Regular audits of ICT use will establish if the online safety policy is adequate and that the implementation of the policy is appropriate and effective

Online Safety complaints

- Staff misuse will be referred to the Headteacher
- Complaints made about Internet misuse will be dealt with by the Online Safety Lead and SLT
- Complaints of a child protection nature must be dealt with in line with the school Child Protection Procedures
- Parents and pupils will be informed of any necessary complaints procedure
- Parents, pupils and staff will be made aware of the consequences of the misuse of the Internet or school resources Regulation
- Pupils will be informed that Internet use will be monitored
- Instruction in responsible and safe use should precede all Internet and E-mail access
- Staff will be made aware of their responsibilities through the distribution of the online safety policy
- Staff will be informed that Internet use can be monitored
- Monitoring will be carried out by the Online Safety Lead working to clear procedures for reporting issues
- Parents/carers will be made aware of the School's online safety policies

Abuse of the System

Any transgressions of the rules which are minor can be dealt with by the teacher as part of normal class discipline. Other situations could potentially be serious and sanctions available include:

- An interview/counselling by a member of SLT
- Informing parents or carers
- The removal of Internet or computer access for a set period of time
